

Wissper

# Birdfeeder

## You need:

- 200g solid coconut fat
- 300g birdfood mixture
- cookie cutters
- kitchenfoil
- toothpick
- piece of rope

1. Wrap kitchen foil around the bottom side of the cookie cutters. You should wrap it tight and up to the edge of the form for the liquid not to spill out.
2. Heat the coconut fat until it melts.
3. Add the birdfood
4. Fill the wrapped form with the mixture
5. Place a stick into the mixture to make room for stringing a piece of rope
6. Store the filled forms at a cold place until the fat hardens and the mixture is solid
7. Remove the birdseed-feeders from the cookie cutters and hang them in your trees
